Aramid cord

3) Tessuto in nylon sul dente  
Nylon fabric tooth facing

- Rinforzo kevlar
- Alte prestazioni
- Bassa manutenzione

- Aramid reinforced
- High performance
- Low maintenance

Le cinghie dentate **PLS RUBELT® K PLUS**, costituiscono la più recente realizzazione nel campo delle trasmissioni per rulliere.  
Queste cinghie, grazie alla loro specifica costruzione, permettono trasmissioni ad elevata potenza, lunga durata e bassa manutenzione.

Timing belts **PLS RUBELT® K PLUS**, constitute the most recent realization in the transmission of roller conveyors.  
These belts, thanks to their specific structure, allow the realization of high power transmission, longer working life and low maintenance.
